ANNUAL REPORT
2013
DEAR MEMBERS AND FRIENDS,

As a relatively new Board member and your current President, I admire the accomplishments of this organization since its founding, and I’m ignited by the ones I’ve been a part of in 2013. Over the last year, we have empowered the Bike Union to make measurable good on the mission.

Our support and presence has meant progress, from better infrastructure design and commuter encouragement, to increased access to community repair education, innovative data analysis, political attention, and more. Together we can deliver a safe, multimodal and collaborative Boston, one with more and more transformative and celebrated community experiences.

For me, Bike Union membership has consistently meant opportunities to grow as a cyclist, a professional, a community member and a leader. At each stage of involvement, I’ve learned to be more skilled at identifying obstacles to safer streets (including my own riding, driving, and walking behaviors); to listen better to others’ points of view in considering policy and business approaches; to maintain trust across a core team within a broader network of allies; to build mutual respect and understanding across neighborhoods, professions, organizational missions and socio-economic divides. I greatly appreciate the dedicated staff, intern and volunteer time that merges with and amplifies other active transportation organizing efforts in this city, which in turn informs our programming so we can adapt to community needs.

Our collective role in shaping this organization is critical to creating a robust Boston bike culture. The goals we set, the methods we adopt, and the progress we make through the rest of this year and beyond depend on each of us in this evolving Boston bicycle movement. The pace of change on our streets, shifts in our transportation culture, and the Union’s ability to respond to your needs relate directly to the energy and support you contribute to Union activities.

In the face of climate change, cyclist and pedestrian casualties, health disparities and socio-economic tensions, there is no time to waste in revealing this truth: The bicycle is a simple solution to some of the world’s most complicated problems.

To do this well, we need you. Come learn from, grow through, and accomplish personal and collective goals with us. I look forward to working with you!

With gratitude,

Vanessa L. Green
Board President
BUILD A WORLD CLASS NETWORK

BIKE NETWORK MASTER PLAN
With representatives on the city of Boston’s Bike Network Plan Advisory Group, the Bike Union advocated to include a long-term vision that now serves as the ultimate goal for a fully built-out network. Knowing what’s possible on every desired part of the network gives local bike activists a powerful tool in their own neighborhoods. Look up your part of the city at: maps.cityofboston.gov/bikenetwork

NEPONSET GREENWAY AND DORCHESTER COAST TRAIL
In 2012 and 2013 the Bike Union supported the DCR and MassDOT on two TIGER grant applications by completing bike counts in the area and creating a video of the future path’s route. Neither grant succeeded, but the paths quickly became a priority for Gov. Deval Patrick. 100 percent design is funded and construction funding is likely coming soon.

SEAEVER STREET CYCLETRACK
The Bike Union helped neighborhood residents organize and make suggestions to Boston’s Public Works Department that resulted in an improved design for Seaver Street in Roxbury. What was once a bike lane is now a mix of bike lanes and cycletracks.

MORTON STREET BUFFERED BIKE LANE
The new Morton Street Buffered Bike Lane—won by the Bike Union as part of a repaving project—is the first step in acquiring a cycletrack that will connect Mattapan and Dorchester residents to the benefits of the SW Corridor.

CONNECT HISTORIC BOSTON
The Boston Cyclists Union participated in the Connect Historic Boston advisory group that proposed a figure-8 cycletrack through downtown Boston, supported an application for a federal TIGER grant, and worked in local communities and citywide to bring 80-120 supporters to each public meeting on the project. The first phase of the “Boston loop” as it is sometimes called, will include Atlantic, Commercial and Causeway streets, and will likely be complete by 2017.

CASEY ARBORWAY/SW CORRIDOR EXTENSION
After successfully organizing public support for an at-grade solution for Casey Arborway in 2011-12, the Bike Union sat on the Design Advisory Group for the project in 2013. The result, going out to contract in April 2014, is an off-street bike path connection from the Arboretum to Franklin Park that isn’t in the shadow of a highway bridge, and a cycletrack connection that allows cyclists to avoid exposure to cars on a difficult stretch of Washington Street toward Roslindale. The project is scheduled to be completed in 2016.

ORGANIZING GROUP FOUNDED
The influence of the Organizing Group, founded in 2013, is beginning to be felt with the citywide coordination of the #winterbiker social media campaign and many other efforts. The O.G. brings together bike activists from all parts of Boston, Brookline, Cambridge and Somerville to share best practices, devise ways to build the bike movement, and press forward with local and citywide campaigns. Participate in the Organizing Group’s monthly meetings by calling 617-516-8877 or emailing us at info@bostoncyclistsunion.org.
BEACON STREET CYCLETRACK

When Somerville’s plan for cycletracks on Beacon Street ran into opposition from the business community in 2013, the Bike Union sprang into action. Bike Union interns created and executed a Customer Intercept Survey, which illustrated that local businesses could actually benefit from a better bike facility—and that bike customers are just about as common as car customers on Beacon. A handful of local businesses now support the cycletrack plan, which is currently in the 75% design stage with a potential completion date of 2015.

PAVING THE WAY ON THE PUBLIC GARDEN CYCLETRACK

The Bike Union has been slowly building grassroots support groups in Beacon Hill and the Back Bay for a two-way cycletrack around the Public Garden. The work began with a Union volunteer’s rendering of what the facility would look like. The rendering has appeared in many publications and blogs since, and has influenced the city to use renderings in their presentations of this and other cycletrack projects.

Ridership has increased 23% since the Bike Union began in 2010 (based on ACS data)

Boston is ranked 13th for bike commuting among the 70 largest cities

AND

Cambridge is ranked 5th for bike commuting of all cities and towns.

The Bike Union launched 28 mobilizations for public meetings in 2013
BOSTON MAYORAL ELECTION

The Bike Union brought together a coalition of bike groups to create a video questionnaire for Boston’s hotly contested mayoral election in 2013. Top tier candidates answered the questionnaire, and the Bike Union’s Annual Meeting was the first place then Councillor John Connolly and state Rep. Marty Walsh appeared together following September’s primary election.

RESEARCH GROUP FOUNDED

The Bike Union Research Group is a group of volunteers and interns who love research, GIS, and data analysis. Founded in 2013, they meet monthly and get involved in several research endeavors. Want to add your skills to the mix? Contact us at 617-516-8877 or info@bostoncyclistsunion.org and ask to be added to the Research Group listerv.

CRASH DATA

Staff and volunteers of the Boston Cyclists Union working in the Research Group received a Commissioner’s Commendation from Boston Police Commissioner William Evans in 2013 for advocating for and helping to complete the BPD section of Boston’s 2013 Cyclist Safety Report. It was the first time police reports, which indicate the cause of crashes, were used in any crash analysis in the City of Boston. The Union’s crash data work will help the city’s transportation department design better streets for bikes, and also inspire more attention to tracking and learning from pedestrian and motor vehicle crashes as well.

“The Bike Union was instrumental in advocating for the analysis of bike crash data and making the initial connections that put me in a position get the job done.”
—Dahianna Lopez, Rappaport Fellow and co-author of the report
“WHEEL WARS” BECOMES “RIGHT OF WAY”

The Bike Union’s social media muscle started flexing with this campaign in 2013 to head off what appeared to be a very negatively themed series of articles at WGBH and Gatehouse Media. After pressure was applied from the Bike Union and its members (you!) the name of the series was changed from “Wheel Wars” to “Right of Way.” This kind of grassroots social media activism became even more effective with the founding of the Organizing Group later in the year.
GROW THE BICYCLE MOVEMENT

BUSINESSES

It’s clear that more and more of Greater Boston’s businesses are jumping on the bicycle bandwagon. Through their support of the Bike Union’s discount program, through event sponsorships and other donations they encourage more people to join the Union, and that means more great programming and organizing. In 2014, the Bike Union will be launching a new initiative under the ‘Commute Boston’ banner that will help employers encourage their employees to bike to work by teaching bike commuting and bike maintenance workshops, and helping to make workplaces more bike-friendly.

MEMBERS

Bike Union members provide the backbone of the organization and the bike community in Boston. The Bike Union’s board and staff are grateful for the support, and strive to build an organization that engages the membership in accomplishing their own goals and realizing their collective vision. Members can get directly involved in working groups, board committees, and as volunteers—and it is their membership dues that keep the organization alive and help it grow.

COMMUNITY BIKE GROUPS

Boston is known worldwide as a center of innovation and as such, there is no shortage of new bike groups popping up in the city. The Bike Union helps these smaller groups grow and achieve their goals. Whether it’s helping JP Bikes organize the Spring Roll ride in Jamaica Plain, supplying parts and bike repair stands to the Bowdoin Bicycle School in Dorchester, or advising the Commonwheels Bicycle Collective in Allston on how to administer a small non-profit, the Bike Union helps these and many other small groups that have bicycles in their heart. Providing assistance to these new leaders in the bike community helps serve the Bike Union’s core mission in exponential ways.

A map of Bike Union event locations in 2013.
The twin goals of the Bike to Market program are to build capacity for bike repair and maintenance in every neighborhood of the city, and to inform and organize people who support better biking. In 2013 the Bike to Market program held 59 weekly events in six locations in Dorchester, East Boston, Charlestown, South Boston, Somerville, and Roxbury. Each location was led by a Bike to Market captain who helped other volunteers grow and learn.

In a collaborative effort between the Emerald Necklace Conservancy, LivableStreets Alliance, and the Sustainability Guild, the Boston Cyclists Union opened up Blue Hill and Huntington avenues to people. The Boston Globe said the event “took on deeper meaning on Blue Hill Avenue, a street residents believe has been unfairly maligned as a haven of crime and violence... transforming the busy thoroughfare lined with storefront churches and Caribbean restaurants into a neighborhood festival brimming with musicians and families.”
